Location: Bengaluru, India

Email: shahs6450@gmail.com

Mobile: +91 8002214611

PROFESSIONAL SUMMARY

Python Developer with **5+ years** of experience designing and scaling **REST APIs**, **backend automation**, and infrastructure tooling across **finance** and **networking domains**. Led a production **NGINX-to-Envoy** load balancer migration supporting **3M+ requests**, cut manual effort by **80%** through Python automation, and reduced MTTD by **~40%** via real-time monitoring tooling. Skilled in **Python**, **Flask**, **FastAPI**, and REST API design with a strong DSA foundation and production first mindset. Adept at delivering production-grade backend solutions in Agile environments.

TECHNICAL SKILLS

Languages: Python, JavaScript

Frameworks/Libraries: Flask, FastAPI, Pydantic, Requests, pandas, bootstrap

Databases: MySQL, PostgreSQL, Redis

Testing: Pytest, Postman (API testing & payload validation)

Auth/Security: OAuth 2.0, JWT

Tools: Visual Studio Code, Git, GitLab, Postman, ServiceNow, Axiros AXESS

Others: Azure, Docker, CI/CD, AWS EC2

Practice: Agile / Scrum, REST API design, code review, test-driven development

EXPERIENCE

Technology Analyst

Infosys India Pvt Ltd

Dec 2025 – Present

Bengaluru, India

Tech Stack: Python | Flask | RESTful APIs | FastAPI | Jenkins | PostgreSQL | Linux

- Engineered Python automation scripts for real-time **monitoring**, **alerting**, and **operational workflows**, reducing mean time to detect (MTTD) issues by **~40%** across infrastructure systems.
- Integrated **RESTful APIs** and backend services to automate infrastructure management.
- Built a Python Fabric-based **configuration management tool** to orchestrate shell-script execution across **150+** remote hosts and containers, eliminating repetitive manual SSH operations.
- Built and maintained CI/CD pipelines using Jenkins and Bitbucket Pipelines to automate testing and deployment of backend automation services.
- Led **end-to-end** production migration of load balancer layer from **NGINX to Envoy (v1.37)** with **WAF** integration, maintaining high availability across **3M+ requests** in traffic with zero service downtime.
- Worked in the networking domain supporting device management and provisioning workflows using the Axiros AXESS Platform.
- Performed systematic **API testing**, **payload validation**, and **backend workflow verification** using Postman and custom Python test suites.
- Collaborated with cross-functional teams in Agile environments to support **production issues**, **deployment activities**, and automation enhancements.

Application Development Analyst

Accenture India Pvt Ltd

Oct 2021 – Dec 2025

Bengaluru, India

Tech Stack: Python | Flask | PowerShell | RESTful APIs | JavaScript | Postman | ServiceNow | MySQL

- Developed and maintained scalable backend services and RESTful APIs in Python, Flask, and Django supporting 5+ business-critical finance applications serving 1,000+ internal users.
- Created Admin dashboard for data visualization and regular maintenance activities using Django.
- Built Python automation scripts that eliminated **80%** of **repetitive manual work** saving the team an estimated **200+** person-hours per month and reducing human-error-related **incidents by 60%**.
- Led a zero-downtime migration of **legacy automation** workflows to a modernised platform over a 3-month rollout, maintaining full regulatory compliance and **no production disruptions**.
- Automated monthly ServiceNow **data extraction** using **Python**, ensuring efficient and **reliable reporting**.
- Mentored 2 junior developers in Python best practices, test-driven development.

EDUCATION

Arya Institute of Engineering and Technology
Bachelor of Technology in Computer Science Engineering.

Jaipur, India
Aug 2017 – Aug 2021

PROJECTS

URL Shortener [link](#)

Tech Stack: Python | FastAPI | RESTful APIs | React | NGINX | AWS EC2 | Linux | Git | OAuth 2.0

- Built and deployed a **full-stack** URL Shortener application using **FastAPI** for **backend** services and **React** for the frontend.
- Developed **RESTful APIs** for URL shortening and retrieval, with the **FastAPI** backend running as a **systemd** service using Unicorn on **AWS EC2**.
- Automated AWS EC2 environment setup and application deployment using Bash scripts, and configured NGINX as a reverse proxy to serve the React frontend and route `/api/` requests to the FastAPI backend.

Desktop Voice Assistant [link](#)

Tech Stack: Python | SpeechRecognition | Google APIs | pyttsx3 | OAuth2

- Developed a **voice-activated assistant** automating office tasks **email dispatch**, Google Calendar event creation, and app launching via Gmail and **Calendar APIs** with **OAuth 2.0**.
- Implemented **dotenv-based secret** management and fail-safe command parsing, achieving 95%+ command recognition success rate in end-to-end testing.
